

FAST, RELIABLE SERVICES FOR SPE-1000 LABELS

Do you need NEXT DAY product compliance? Intertek offers fast turnaround times for Special Inspections and are labeled on the spot to SPE-1000.

We offer fast turnaround times and reduced travel costs with localized service for Electrical Special Inspections across Canada. Although Special Inspection services are not intended to replace full certification, there are situations that require inspections quickly to verify compliance.

Products found to comply with SPE-1000 are labeled on the spot. The ETL label is a visual proof to inspectors and Authorities Having Jurisdiction (AHJs) that the equipment has met applicable requirements.

The ETL Listed Mark is the fastest growing certification mark in North America, widely accepted by AHJs and building code officials. We'll keep you from getting red-tagged and get you back in business – fast!

When do Special Inspections apply?

- Custom-built equipment that does not have the required compliance labels for Canada
- Imported equipment sold in Canada that does not have a required label to prove it complies with Canadian requirements
- Limited quantity production

Intertek's Special Inspection Process

Our Inspectors will walk you through the process, evaluate your product and assist you in obtaining approval from the Authority Having Jurisdiction (AHJ).

When meeting the requirements of SPE-1000 for electrical equipment, rely on our inspectors to assist you every step of the way.

The ETL Special Inspection Label

Once your equipment has been evaluated and is found to be in compliance with industry standards and requirements of the AHJ, the Intertek inspector will apply an ETL Special Inspection Label. The ETL Label is the proof you need and indicates to AHJs that your equipment meets all specified safety requirements.

About Intertek

Intertek is an accredited Test Lab and Certification Body by the Standards Council of Canada (SCC) and in the U.S. is an OSHA recognized NRTL. Authorities Having Jurisdiction (AHJs) in 50 states and throughout Canada accept the ETL Mark as proof of product safety. Today, the ETL mark is featured on millions of products sold by major retailers.

Global Certifications, Local Offices, Flexible Services

Intertek has one of the largest and most experienced Special Inspection teams available at multiple locations worldwide. Our commitment to your success doesn't stop at testing and certification – we react quickly, quote competitively and deliver the highest levels of service available.
